

## Fractions

Write your answers first as an improper (top-heavy) fraction, and then as a mixed fraction in its simplest form.

Q1  $\frac{4}{5} \times 3 = \boxed{\quad} = \boxed{\quad}$

Q2  $\frac{5}{8} \times 3 = \boxed{\quad} = \boxed{\quad}$

Q3  $\frac{2}{3} \times 2 = \boxed{\quad} = \boxed{\quad}$

Q4  $\frac{4}{6} \times 4 = \boxed{\quad} = \boxed{\quad}$

Q5  $\frac{3}{4} \times 5 = \boxed{\quad} = \boxed{\quad}$

Q6  $\frac{5}{7} \times 2 = \boxed{\quad} = \boxed{\quad}$

Q7  $\frac{1}{2} \times 3 = \boxed{\quad} = \boxed{\quad}$

Q8  $\frac{3}{5} \times 3 = \boxed{\quad} = \boxed{\quad}$

Q9  $\frac{6}{8} \times 5 = \boxed{\quad} = \boxed{\quad}$

Q10  $\frac{1}{3} \times 4 = \boxed{\quad} = \boxed{\quad}$

Q11  $\frac{5}{6} \times 2 = \boxed{\quad} = \boxed{\quad}$

Q12  $\frac{1}{4} \times 5 = \boxed{\quad} = \boxed{\quad}$

Q13  $\frac{4}{7} \times 6 = \boxed{\quad} = \boxed{\quad}$

Q14  $\frac{3}{5} \times 8 = \boxed{\quad} = \boxed{\quad}$

Q15  $\frac{7}{8} \times 3 = \boxed{\quad} = \boxed{\quad}$

Q16  $\frac{5}{9} \times 6 = \boxed{\quad} = \boxed{\quad}$

Q17  $\frac{6}{7} \times 6 = \boxed{\quad} = \boxed{\quad}$

Q18  $\frac{3}{4} \times 6 = \boxed{\quad} = \boxed{\quad}$
