- ✓ Suction vent for power control
- ✓ Ergonomic grip for comfort and control

GREAT FOR VENTS, KEYBOARDS, CARS, ANYWHERE A
NORMAL HOSE CAN'T REACH!

Can't clean those hard to reach places? Dust Daddy is the vacuum attachment you've been praying for! With 36 tiny suction tubes, like **flexible** straws, it attaches right onto your vacuum hose and turns it onto a **flex-headed micro-suction** machine that can pick dust and dirt from the tiniest spaces!

Fed up of crumbs everywhere? Now fluff, lint and crumbs that have settled in those little crevices, nooks and crannies like between keys on a computer keyboard, or down inside an air vent in your home or car, can be vacuumed with ease.

The tubes find the dirt and suck it away without you having to first remove all the small objects like coins, keys, cutlery, tools, jewellery etc, so you **save so much time and effort** keeping your home clean.
