**ONLY**

**£ 9.99!**

**Over 10 million  
sold worldwide!**

Smarter than your average torch, Flexi Torch is the **flexible, bendable** flashlight that **lights up** areas other torches just can't reach. It has a **telescopic head** that extends up to 57cm and a bending neck with 360° flexibility so you can light up awkward, cramped, hard-to-reach areas.

**Dropped your keys?** It also has a **magnetised** head, which you can use to **retrieve** lost or trapped metal items, like keys or screws.

**Need to keep your hands free?** It's not just good for cramped areas - the magnet in the base means that you can **stick** it to metal surfaces, **giving you light** without you having to hold it. You can also wrap the **bending** head around poles or hooks to use it as a **hanging** light.
